

Amir Hosseini

Back-End Developer

About Me

Passionate backend developer and fast learner focused on building clean and scalable solutions to real-world problems.

I value collaboration and work in teams with a positive, growth-oriented attitude.

Projects

- **Real-Time Chatroom** – Django, Channels, WebSocket – [Github Link](#)

Built a real-time chat app with live message updates via Django Channels and asynchronous WebSocket communication.

- **TODO App** – Django, DRF, PostgreSQL – [Github Link](#)

Developed a task management system with JWT authentication, 2FA login, and Redis caching to enhance performance.

- **Telegram Bot** – Python, TelegramBotApi, SQLite – [Github Link](#)

Created a dynamic menu system with context saving and auto-refresh features for real-time user interaction.

Skills

Programming Concepts

- Object-Oriented Programming
- Functional Programming
- Exception Handling
- Regex
- Common Design Patterns
- MVC

Back-End Development

- Python
- Django Framework
- Django REST Framework (DRF)
- Django ORM
- Query Optimization
- JWT Authentication
- Testing (Unittest, Pytest)
- Permissions & Throttling
- Signals
- Caching with Redis
- Swagger / API Documentation
- Async & Task Queues (Celery, RabbitMQ)
- Django Channels (WebSocket)

Database

- Database Design & ERD
- PostgreSQL
- MongoDB

Version Control & Deployment

- Git & GitHub
- Basic Docker
- Basic CI/CD
- Basic Linux Commands

Additional Skills

- Basic Front-End Tools
- (HTML, CSS, JS, jQuery)
- Web Scraping & Automation (BeautifulSoup, Requests)
- Workflow Automation (N8N)
- Chatbot Development (TelegramBotAPI)

Soft Skills

- Adaptability & Fast Learning
- Teamwork & Collaboration
- Problem-Solving
- Attention to Detail
